

Open Access is a kind of free and unrestricted online availability of knowledge that provides immediate, worldwide, barrier-free access to the full text of research articles without requiring a subscription to the journal in which these articles are published. Based on the original BOAI statement ([Budapest Open](#)

[Access Initiative](#)

) we signed

(http://www.budapestopenaccessinitiative.org/list_signatures

), readers are allowed to copy, use, distribute, transmit and display the work publicly and to make and distribute derivative works, in any digital medium for any responsible purpose, subject to proper attribution of authorship.

Since, an article processing (tracking, editing, formatting, page design, online publication, hosting, etc.) has considerable cost for each journal's team that do not charge for access, they rely on other means of funding publication. In this publishing model, the costs are usually covered by the author's institution or research funds. These Open Access charges replace subscription charges and allow the publishers to make the published material freely available to all interested online readers and audiences. At the same time, authors who publish in Open Access journals retain the copyright of their article.

Other than their cost-recovery model, Open Access journals are no different from traditional subscription-based journals; they undergo the same peer-review and quality control as any other scholarly journal. Moreover, Open Access allows for maximum visibility, uptake and use of the published material.

Scienceline journals apply the [Creative Commons Attribution NonCommercial 4.0 License \(CC BY-NC 4.0\)](#) to all manuscripts to be published.

An Open Access Publication is one that meets the following two conditions:

1. The author(s) and copyright holder(s) grant(s) to all users a free, irrevocable, worldwide, perpetual right of access to, and a license to copy, use, distribute, transmit and display the work publicly and to make and distribute derivative works, in any digital medium for any responsible purpose, subject to proper attribution of authorship, as well as the right to make small numbers of printed copies for their personal use.
2. A complete version of the work and all supplemental materials, including a copy of the permission as stated above, in a suitable standard electronic format is deposited immediately upon initial publication in at least one online repository that is supported by an academic institution, scholarly society, government agency, or other well-established organization that seeks to enable open access, unrestricted distribution, interoperability, and long-term archiving.

Authors who publish with this journal agree to the following terms: 1. Authors retain copyright and grant the journal right of first publication with the work simultaneously licensed under a Creative Commons Attribution License that allows others to share the work with an acknowledgement of the work's authorship and initial publication in this journal. 2. Authors are able to enter into separate, additional contractual arrangements for the non-exclusive distribution of the journal's published version of the work (e.g., post it to an institutional repository or publish it in a book), with an acknowledgement of its initial publication in this journal. 3. Authors are permitted and encouraged to post their work online (e.g., in institutional repositories or on their website) prior to and during the submission process, as it can lead to productive exchanges, as well as earlier and greater citation of published work.
